DETAILED ACTION

The examiner acknowledges the amendment filed September 26, 2005.

Claim Objections

Claims 1-5 are objected to because of the following informalities: generally, parenthetical expressions should be removed; abbreviations in the claims should be spelled out; lower case letters should precede list items; and terms in quotations. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicant should remove ambiguity in the claims by affirmatively claiming a Markush group. In claim 1, in limitations (e) and (f), claim 2, the applicant should avoid using the terminology "chosen from the following" and use a conjunction "and" or "or" prior to the last alternative limitation. See MPEP 2173.05 (h). Additionally, the "selected from the group consisting of" and using "and" prior to the last alternative limitation is preferred.

The applicant states in claim 1(e)(ii) "the kind of activities" this term is not definite.

Art Unit: 3736

The applicant states in claim 1(e)(iv) "the kind of activities" this term is not definite.

The applicant states in claim 1(e)(ii) "the kind of activities" this term is not definite.

The applicant states in claim 3(b) "the kind of activities" this term is not definite.

The applicant states in claim 3(c) "the kind of activities" this term is not definite.

Claim 2 is rejected as being dependent on a rejected claim 1, and claims 4, and 5 are rejected as being dependent on a rejected claims 1 and 3

Note to the applicant. The examiner has performed a prior art search and has not found any prior art to reject the applicant's invention. However, the examiner reserves stating that the claims are allowable over the prior art since the numerous 35 U.S.C. 112, second paragraph, rejections have made it extremely difficult to ascertain the scope of the claimed language.
